

everything you require

deployment solutions

Free your resources! It's what we do best

If you're looking to deploy new machines in a complex environment, Wirespeed's suite of installation services can deliver.

Our customizable solutions are designed to package your IT installations into efficient, managed and cost-effective projects.

Wirespeed manages the technology, process and logistics of every project. Our skilled experience in deploying thousands of IT assets - from workstations to servers - will facilitate a seamless implementation, every time.

Our deployment process provides bespoke solutions that steer all aspects of the project from planning, project management, order fulfilment and logistics through software and hardware installation and disposition of legacy assets. All solutions are tailored to your future needs while remaining pragmatic and achievable.

development and installation lifecycle. All organisations have legacy software and Wirespeed is proficient in managing the migration of this software to modern hardware.

Post-Install Support

Even after days of preparation, when the new system goes live there will always be the mouse that doesn't work. Wirespeed will provision technical floor-walking engineers to cater for a glitch-free transition.

Storage & Logistics

During the deployment period it may not be feasible to store, image and configure hardware onsite. Wirespeed will provide transport and storage facilities to cater for these situations.

Asset Tagging

Keeping track of capital equipment is over-come by registering and tagging all appliances.

Full featured process

Wirespeed offers an end-to-end deployment solution that encompasses planning, development, deployment, extended support and asset management options.

Growth

Our deployment solutions can be easily expanded to deliver new benefits as your business grows. We offer the practical solution, not the golden solution - unless required.

“The definitive result: fast, seamless, cost-effective deployments.”

Wirespeed's solutions provide seamless operations and a single point of contact for your project. Coupled with our project management proficiency, you can minimise the time required to get your IT systems up and running. This allows your valuable in-house IT professionals to stay focused on strategic IT initiatives.

We have the know how

The experience gained from the deployment of thousands of IT assets enables Wirespeed to address key deployment concerns:

Timeline Dependencies

The most common cause of failure in projects is poor communication between third-party suppliers. This risk is mitigated through Wirespeed's careful liaison between suppliers and internal resources thereby providing seamless, efficient & co-ordinated programs. Timeline dependencies are identified early to allow co-ordination between suppliers and Engineers, allowing cost-effective use of time.

Software Integration

Experts are provided to address the manual stages of software installation and, if necessary, carry out a complete offsite or onsite image

This system is supported by the documentation of all processes, including physical locations, logical network addresses and end-user details.

The value of Wirespeed Deployment Services

Wirespeed's Value-Added-Deployment services offer a complete IT lifecycle management solution, while maintaining the flexibility to meet specific customer needs. Whether you choose to utilise only a portion of a package or require a total solution, we can offer a customised, pragmatic program to suit your business.

Customised Deployments

Wirespeed will provide a deployment that will not disrupt your day-to-day operations. Deployments have been carried out internationally and services can be provided every day of the year.

Optimise your Return on Investment

Providing planning for the most cost-effective solution to your business is a core objective. Utilise your in-house expertise for complex and strategic direction while Wirespeed provides the manpower to implement your vision without duplicating effort.

MANAGING THE DEPLOYMENT - THE BUILDING BLOCK APPROACH

POST INSTALLATION

Wirespeed will supply technical floor-walking engineers and provide associated data and technical documentation. Support packages provide continued life-cycle assistance.

DEPLOYMENT

Following the completion of the image lifecycle, Wirespeed delivers and installs fully integrated systems. This includes the installation of hardware, peripherals and data migration.

INTEGRATION

The team provides hardware and software integration services including image lifecycle development, custom and legacy application integration.

PROCUREMENT

After the positioning of all customer requirements, the team defines and executes procurement channels and identifies suppliers.

ANALYSIS & POSITIONING

A detailed assessment of all customer requirements & processes. Determining
