small business IT solutions

With over twenty IT solutions for the small business.
We **WILL** have the right one for you.

All small businesses are different, therefore Wirespeed's Small Business solutions are designed to create a faster and more efficient business environment for the agile client. Wirespeed's small business service portfolio has been created to help small businesses, with up to 75 computers, punch above their weight.

The flexible, integrated product suite, allows small organisations to enjoy the functionality and benefits previously only available to large corporate enterprises:

- Email and security-enhanced Internet connectivity
- Productivity boosting through data sharing
- Collaboration
- Common task integration
- Efficient monitoring and support

Engineering your solution

Our team of technical experts will determine the optimal solution for your organisation. Whether this solution is comprised of a single, multiple, partial or customised package, you can rest assured it will help to raise awareness, productivity and profits.

Package #1: The Integrated Communications Platform. ICP

The Integrated Communications Platform (ICP) is an all-in-one solution that helps businesses take advantage of the rapidly changing Internet, manage and grow customer relationships, enhance company productivity, and even support mobile employees or branch offices.

"It is a simple, reliable, complete voice and data communication solution for small businesses..."
Southwest IT Forum

The ICP simplifies office communication. It offers everything needed to support phones,

With Windows Small Business Server you can:

Automatically protect business information. Business information is protected in many ways by Windows Small Business Server. For example, the Backup Wizard ensures that all your data is backed up on a regular schedule.

Get more done every day.

Windows Small Business Server delivers stable, capable infrastructure that supports mobile computing and, combined with information management and collaboration tools, increases worker productivity dramatically.

Reach more customers and serve them better, all day, every day.

Robust messaging, the ability to create effective business Web sites, and the use of security-enhanced, reliable communication tools foster more positive customer relationships.

Experience the Business Value -

The deployed combination of SBS and ICP leads to dramatic gains in business value, as reflected by:

“Reach more customers and serve them better, all day, every day.”

Making I.T. Simple

Determining the correct IT solution can be a vague and mind-numbing process; however, by choosing Wirespeed as your Small Business I.T partner, computing benefits becomes as clear as 1, 2, and 3.

Identifying your needs

Our consultants will ask the correct questions in order to identify your requirements.

Do your employees need to access email, calendars, contacts, phone systems, etc...when outside the office?

Do you have a need to work on the same documents? Between Branch offices?

Does your business rely on email or a connection to the internet? Would you like to restrict the sites that users view on the internet?

Would you like to extend the geographical reach of your products/sales?

Is your email out of control because of junk mail?

fax machines, computers, printers and high-speed Internet connectivity.

The result is a complete, cost-effective and feature-packed communications platform that offers:

- Integrated telephone and computer network
- Voice mail and auto-attendant
- Remote access
- High-speed Internet access
- Security and collaboration
- Expansion modules and units

Package #23: Microsoft Small Business Server Solutions (SBS)

Windows Small Business Server is a server solution that provides small businesses with great features, such as e-mail, junk filtering, business intranets, remote connectivity, support for mobile devices, file and printer sharing, backup and restore capabilities and an application platform for collaboration.

INCREASED RESPONSIVENESS TO CUSTOMER NEEDS & REQUIREMENTS

Enterprise-grade capabilities such as built-in voice mail and auto attendant tell customers your business is established and forward thinking

High speed Internet connectivity allows you to respond to customer e-mail, find solutions for customers and research competitors

IMPROVED PRODUCTIVITY THROUGH REDUCTION IN TASK WORK AND INCREASED OUTPUT

The ability to share documents electronically will help facilitate customer inquiries and help ensure that your company is always on top of its orders, has information at its fingertips, and can support additional business customers

Dozens of productivity enhancement tools allow employees to find documents easily, collaborate on projects, automate many routine tasks, and access the workplace remotely

ADDITIONAL TIME FOCUS ON CORE BUSINESS ISSUES

Built-in messaging capabilities allow receptionist and/or administrative staff to focus on higher-value activities

The computer telephony interaction features, allow dialing directly from Outlook, ACT, Palm Pilot and Pocket Windows

INCREASE PROFITS
